

LOUISIANA COMMUNITY & TECHNICAL COLLEGE SYSTEM
Policy # 1.044

Title: Rank and Promotion Eligibility Framework for Permanent Full-Time LCTCS Faculty Members

Authority: Board Action

Original Adoption: May 9, 2007

Effective Date: May 9, 2007

December 31, 2007

Last Revision: Initial

July 11, 2007

INSTRUCTIONAL RANK AND PROMOTION ELIGIBILITY POLICY INTRODUCTION

Levels of academic and technical rank recognize progressive levels of achievement and stature within the postsecondary teaching profession. More than length of service, advanced ranks are recognition of quality, depth of performance, achievement, and contribution to the college by the faculty member. Special care must be taken in assigning faculty ranks to new appointees and in making promotions in rank from year-to-year. Each institution shall, in conformity with policies of the LCTCS Board of Supervisors, establish a policy setting criteria and procedures for faculty rank and promotion who are employed as permanent full-time faculty, to teach credit-bearing courses, by the institution. All institutional procedures for implementation of the policy shall be approved by the LCTCS President and the LCTCS Board of Supervisors prior to implementation. The awarding of rank is normally determined by the Chancellor/Chief Executive Officer. The approval of initial rank rests with the LCTCS System President based upon the recommendation of the Chancellor/Chief Executive Officer.

This framework addresses minimum qualifications and criteria for faculty to be considered for rank and promotion within LCTCS colleges. LCTCS colleges have the authority to increase the minimum criteria considered for each level of rank and promotion within this document. However, the Board of Supervisors must approve each college's initial policy based on the approved LCTCS framework. Subsequent college policy revisions must be approved by the System President. All faculties must meet the academic educational requirements for the level of Instructors as specified by their institutional accreditor. (Southern Association of Colleges and Schools Commission on Colleges [SACS-COC] or Council on Occupational Education [COE]).

A. RANKS: Academic and Technical

Ranks are designed to recognize levels of achievement and stature within the postsecondary teaching profession. While the terminology referencing rank is often designated as Academic and/ or Technical, the distinctions are often not distinctly separate. Provisions within this policy/ framework focus upon transferability of the course assignments in an attempt to make a clearer distinction – for example:

*Teaching courses designed for transfer and/ or

*Teaching courses that were not designed for transfer.

Instructional rank is awarded in a single discipline. In general:

- *Most courses within disciplines leading to an Associate of Science (A. S.)(ex. English Instructor, Assistant Professor of Nursing, etc.), Associate of Arts (A.A.) and Associate (i.e. as in Nursing and General Studies) are designed for transfer.
- *General Education courses in any degree program are designed for transfer.
- *Technical courses in programs that terminate in a C.T.S., CAS Certificate of Applied Science, Technical Diploma, or A.A.S. content courses are not usually designed for transfer.
- *Non-Credit courses are neither designed for credit nor for transfer.

B. RANK AND PROMOTION BETWEEN THE INSTRUCTIONAL RANKS

The following chart lists the requirements to be promoted from one rank to the next higher instructional rank. Faculty may be hired at the rank most commensurate with their educational and professional preparation. Individuals with educational attainment and/ or distinguished service within the field (i.e. Grammy Award, upper level industrial experience, etc.) may be hired within the Rank that most appropriately reflects these attainments. Institutions must provide for these instances in their plans. Faculty members teaching in programs that require certification/ licensure (i.e. required by Regents' programmatic accreditation standards, state boards, or industry standards, etc.) to teach in that program must maintain current respective certification/ licensure for that program. Faculty in clinical or similar setting or director positions may be required to meet additional requirements.

Specifically applied to the Ranks and Promotion between the Ranks, the following framework should guide the work of the colleges in the development of their institutional Rank and Promotion policies:

Rank	Time Provisions	Evaluation Provisions	Minimum Educational Provisions for Teaching Courses Designed for Transfer (1)	Minimum Educational Provisions for Teaching Courses Not Designed for Transfer (2)
To: Professor From: Associate Professor	3 years at the rank of Associate Professor	Satisfactory or Above for the last 3 consecutive years	Masters Degree, or equivalent, relevant to the position or other highly-relevant qualifications that meet course transfer requirements. Doctorate or other relevant terminal degree in field preferred.	May follow provisions for teaching courses designed for transfer or demonstrate other highly-relevant, equivalent qualifications.
To: Associate Professor From: Assistant Professor	3 years at the rank of Assistant Professor	Satisfactory or Above for the last 3 consecutive years	Masters Degree, or equivalent, relevant to the discipline, or other highly-relevant qualifications that meet course transfer requirements.	May follow provisions for teaching courses designed for transfer or demonstrate other highly-relevant, equivalent qualifications.
To: Assistant Professor From: Instructor	3 years at the rank of Instructor	Satisfactory or Above for the last 3 consecutive years	Degree relevant to the course teaching position that meets course transfer requirements. (See SACS-COC <u>Principles</u>).	May follow provisions for teaching courses designed for transfer or demonstrate other highly-relevant equivalent qualifications.
Instructor	Initial Employment as applicable.	Not Applicable at initial hire.	<ul style="list-style-type: none"> A. General Education faculty: 18 graduate hours in the teaching discipline, a Master's Degree in the teaching discipline, or a Doctorate in the discipline. B. Faculty teaching courses transferring to a baccalaureate degree: 18 graduate hours in the teaching discipline, or a Doctorate in the discipline. C. Faculty teaching courses not designed for transfer into a baccalaureate degree: Bachelor's degree in the teaching discipline or Associate's degree and demonstrated competencies 	<ul style="list-style-type: none"> A. Faculty teaching as SACS-COC institutions: Faculty teaching Associate degree courses not designed for transfer to the baccalaureate degree: Bachelor's degree in the teaching discipline or demonstrated competencies in the teaching discipline. <u>Principles of Accreditation 3.7.1.</u> (SACS-COC) B. COE accredited institutions: Faculty has at least a high school diploma (or its equivalent) and demonstrated competency in the technical areas of instructions. (COE Objective 8-B-2). C. COE accredited institutions: Faculty teaching General Education courses in an Associate degree program: a Bachelor's degree with 15 semester (or 23 quarter) hours in the teaching discipline. (In exceptional cases, evidence of

			<p>in the teaching discipline.</p> <p>D. Other highly-relevant qualifications as approved by SACS-COC. <u>Principles of Accreditation 3.7.1.</u> (SACS-COC)</p>	<p>outstanding professional experience or creative achievement in the field may be considered in lieu of formal academic preparation). (COE Objective 8-B-2)</p> <p>D. COE accredited institutions: Faculty members who teach in Associate degree programs have a minimum of an Associate degree. (In exceptional cases, evidence of outstanding experience and skills in the technical field may be considered in lieu of formal academic preparation). (COE Objective 8-B-2)</p> <p>E. COE institutions: Additional requirements may be established for faculty members by the institution's governing board and/or state regulatory agencies. (COE Objective 8-B-2)</p> <p>F. Note: Faculty teaching remedial/developmental courses and/or teaching non-degree occupational or certificate courses (outside of an Associate Degree) must follow their respective institutional accreditor's guidelines.</p>
--	--	--	---	--

- (1) Degrees for teaching courses designed for transfer (i.e. transferring from one associate degree to another associate degree designed for transfer [ex. A.A., A.S., Associate, etc.] or transferring to the baccalaureate degree level, etc.) must be awarded from regionally-accredited institutions. (See the Council for Higher Education Accreditation [CHEA] directory.)
- (2) Degrees for teaching courses not designed for upward transfer should be from accredited institutions; but, the degrees are not required to be awarded, necessarily, from regionally-accredited institutions.

Colleges offering primarily workforce training may opt to create an additional framework for levels of Instructor (i.e. Advanced Instructor, Senior Instructor, Master Instructor, etc.). This would be an institutional decision. [It should be noted, however, that the eligibility for tenure begins at the Assistant Professorial level. See BoR Policy Section II, 4.1 (4.01.05).] The institutional framework should be included within the Institutional Policy and Procedures for Board approval. The following documents should also be included with the Institutional Policy and Procedures for Rank and Promotion for review and Board approval: institutional organizational chart, faculty portfolio (example), description of the Peer Review Process.

Definition of Terms:

Adjunct Faculty: term refers to faculty members holding contracts (or letters of appointment) to teach less than a normal, full-time course load or to teach less than a full session on a semester-by-semester or summer term basis. Adjunct faculty members' contracts contain no guarantee of continued employment.

Assistant Professor: term refers to faculty members who demonstrate good teaching, good student relations, active and recognizably positive contributions to the college; a faculty member, at the rank of Assistant Professor, has demonstrated a genuine contribution to the college's mission in fulfilling the purposes of a community/technical college. The faculty member, at the rank of Assistant Professor, shall have demonstrated collegiate and definite contribution in assigned areas of activity and in the overall development of instructional programs.

Associate Professor: term refers to faculty members who, in addition to those qualities demonstrated by the Assistant Professor, show continuous improvement and contribute to the college and the students. The faculty member, at the rank of Associate Professor, has demonstrated definite leadership in assigned areas of activity and in the overall development of programs. The faculty member, at the rank of Associate Professor, shall have earned recognition for educational leadership within the college for contributing to the mission and purposes of a community and technical college.

Emeritus Titles: term refers to the honorary title of Emeritus as addressed within LCTCS Academic Policy 1.030

Faculty: term generally refers to members of the instructional staff, of each college, holding the rank of Instructor (or higher) engaged in instruction, library services, artistic, and/or investigative positions. The head of each college, and its academic officer, shall be considered members of the faculty. Faculty may be hired and hold other title designations outside those of ranked positions. These other designations may include, not be limited to, positions such as Lecturer, Artist-in-Residence, Visiting Instructor, Critic Teacher, etc. These titles, however, fall outside of the promotion-in-rank framework and eligibility criteria for promotion.

Full-Time Faculty: term refers to faculty placed under contract (or under a letter of appointment) with a designation within the four specified ranks described by this framework absent a reference to Temporary or Adjunct status. This designation is also referred to by the term "permanent" full-time faculty. Faculty employed on a

temporary basis, on a part-time basis, or who are hired with titles outside of the designated ranks, specified within this framework, are not eligible for promotion until such time as their contractual status and their designations are changed to become a part of the specified faculty ranks described within this policy. Full-time faculty may be reflected within nine-month or twelve-month contracts/ letters of appointment. Only full time faculty members are eligible for promotion in rank.

Initial Rank: terms refers to the instructional rank approved for a college's faculty members at the time immediately following Board approval of the college's **first** institutional policy as adopted under this System policy.

Instructor: term refers to a faculty member, who's primary responsibilities include teaching, advising, and service to the college. These duties include professional development and institutional service (all areas). The faculty member, serving at the rank of Instructor, should have a strong understanding of and a belief in the mission and purposes of a community/technical college.

Portability of Rank: term refers to the residual value of rank at one institution when faculty move to, transfer to, or are hired by another institution. Institutions have the option of awarding rank based on previously earned rank from another college or university. Faculty reassigned to a similar position or an administrative faculty position, within the same college, shall retain their instructional rank. Eligibility for further promotion, within the ranks, would be an institutional matter.

Promotion-in-Rank: term refers to the upward progression of recognized title designations which attempt to convey quality and depth of performance, achievement, and contribution to the college by the faculty members upon which the progressive titles in rank are awarded. Progression-in-rank does not mandate salary increase upon promotion in rank. These are institutional policy matters and are beyond the scope of the framework being established by this policy.

Professor: term refers to faculty members who, in addition to those qualities demonstrated by the Associate Professor, exemplifies an outstanding faculty member who has demonstrated excellence in assigned areas: of instruction, professional development, and in the total learning process for the college. This rank is recognition of quality and depth of performance and achievement rather than length of service. The faculty member, at the rank of Professor, shall have earned recognition for contributions of and a belief in the purposes of a community/technical college as well as for contributions to his/her discipline.

Relevant Degree (Baccalaureate/ Masters): term refers to a degree from an appropriately accredited institution of higher education relating to the faculty member's field of instruction as reflected by their credit-bearing course subject area(s) of instruction. (i.e. discipline).
