SUBJECT: Program Revisions and Additions at Delgado Community College

DATE: 03/28/2017

FOR BOARD ACTION:

Recommendation: Staff recommends that the Board approve the program revisions and additions listed below.

Program Revisions to be Delivered 100% through Distance Education Technology

1. Associate of Arts (AA) in Criminal Justice (CIP 43.0107) – **4 STARS**
2. Certificate of Technical Studies (CTS) in Logistics Technology (CIP 52.0203) – **5 STARS**

Program Revisions

3. Associate of Applied Science (AAS) in Hospitality Management (CIP 52.0901) – **4 STARS**

Program Additions

4. Technical Competency Area (TCA) in Juvenile Justice (CIP 43.0110) – **4 STARS**
5. Technical Competency Area (TCA) in Homeland Security (CIP 43.0110) - **4 STARS**
6. Technical Competency Area (TCA) in Water Production Operator I (CIP 15.0506) – **4 STARS**
7. Technical Competency Area (TCA) in Water Production Operator II (CIP 15.0506) – **4 STARS**
8. Technical Competency Area (TCA) in Water Production Operator III (CIP 15.0506) – **4 STARS**
9. Technical Competency Area (TCA) in Water Production Operator IV (CIP 15.0506) – **4 STARS**
10. Technical Competency Area (TCA) in Water Treatment Operator I (CIP 15.0506) – **4 STARS**
11. Technical Competency Area (TCA) in Water Treatment Operator II (CIP 15.0506) – **4 STARS**
12. Technical Competency Area (TCA) in Water Treatment Operator III (CIP 15.0506) – **4 STARS**

13. Technical Competency Area (TCA) in Water Treatment Operator IV (CIP 15.0506) – **4 STARS**
14. Technical Competency Area (TCA) in Water Distribution Operator I (CIP 15.0506) – **4 STARS**
15. Technical Competency Area (TCA) in Water Distribution Operator II (CIP 15.0506) – **4 STARS**
16. Technical Competency Area (TCA) in Water Distribution Operator III (CIP 15.0506) – **4 STARS**
17. Technical Competency Area (TCA) in Water Distribution Operator IV (CIP 15.0506) – **4 STARS**
18. Technical Competency Area (TCA) in Wastewater Collection Operator I (CIP 15.0506) – **4 STARS**
19. Technical Competency Area (TCA) in Wastewater Collection Operator II (CIP 15.0506) – **4 STARS**
20. Technical Competency Area (TCA) in Wastewater Collection Operator III (CIP 15.0506) – **4 STARS**
21. Technical Competency Area (TCA) in Wastewater Collection Operator IV (CIP 15.0506) – **4 STARS**
22. Technical Competency Area (TCA) in Wastewater Treatment Operator I (CIP 15.0506) – **4 STARS**
23. Technical Competency Area (TCA) in Wastewater Treatment Operator II (CIP 15.0506) – **4 STARS**
24. Technical Competency Area (TCA) in Wastewater Treatment Operator III (CIP 15.0506) – **4 STARS**
25. Technical Competency Area (TCA) in Wastewater Treatment Operator IV (CIP 15.0506) – **4 STARS**
26. Certificate of Technical Studies (CTS) in Human Resources Assistant (CIP 52.1001) – **5 STARS**
27. Certificate of Technical Studies (CTS) in Real Estate Professional (CIP 52.1501) – **4 STARS**
28. Certificate of Technical Studies (CTS) in Digital Photography (CIP 50.0605) – **3 STARS**

Background: Every fall, DCC reviews all hybrid programs (i.e., those offered 50-99% via distance education) to determine which can be offered 100% online. This review identified that the AA in Criminal Justice and CTS in Logistics Technology can be offered 100% online, which will open the programs to new markets.

The revisions for the AAS in Hospitality Management will provide greater opportunity for specialization by offering new concentrations in beverage management, meeting and event management, and catering management.

The new TCAs in Juvenile Justice and Homeland Security will be fully embedded in the existing AA in Criminal Justice program, and will provide for greater opportunities for

specialization and provide meaningful credentials for those individuals who do not finish the full AA program.

The TCAs in Water/Wastewater Technology have been developed with the New Orleans Sewage and Water Board to help train future workers to meet the infrastructure needs of New Orleans.

The CTS in Human Resources Assistant and the CTS in Real Estate Professional will both be fully embedded with the AAS in Business and Management. The CTS in Digital Photography will be fully embedded within the AAS in Visual Communication-Graphic Design.

Fiscal Impact: There are no anticipated expenditures associated with these revisions and additions. Faculty and resources are already allocated under existing programs.

History of Prior Actions: There is a history of revising and adding program to better meet student and workforce needs.

Benefits to the System: These revisions and additions will allow DCC to better meet student and workforce needs.

Approved for Recommendation to the Board
Dr. Monty Sullivan

Board of Supervisors
The Louisiana Community and Technical College System
265 South Foster Drive
Baton Rouge, Louisiana 70806

Attention: Paul Carlsen, Ph.D., Chief Content Officer

Dear Dr. Carlsen:

The following items from Delgado Community College are submitted to the Board of Supervisors for possible consideration at the May 10, 2017 Board Meeting:

Change of Classification for an instructional program previously authorized to be delivered via Distance Learning Technologies:

Associate of Arts:
Criminal Justice
(CIP Code: 43.0107)
4 Stars

Justification: The Associate of Arts degree in Criminal Justice at Delgado Community College has been offered since 1975. The A.A. degree program was approved to be offered via Distance Learning Technologies by the Board of Supervisors of the Louisiana Community and Technical College System, February 14, 2007; and, subsequently by the Board of Regents for Louisiana Higher Education in March of 2007. The program is currently listed in the Board of Regents Inventory of Degree and Certificate programs as "Hybrid – 50 percent to 99 percent on-line." This request is to change the designation *from* "Hybrid – 50 percent to 99 percent on-line" *to* "Online – 100 percent online." No curricular modifications are presented for review or action; however, since 2007, all of the courses comprising the instructional program may now be completed on-line, so a change in official designation on the Inventory of Degree and Certificate programs and on the Louisianaonline.org website is requested.

Curriculum Attached

Board of Supervisors
March 21, 2017
PAGE TWO

Request to Offer an Existing Instructional Program via Distance Education Technologies:

Certificate of Technical Studies:

Logistics Management
(CIP Code: 52.0203)
5 stars

Justification: The Logistics Technology program is designed to prepare students for a multitude of career opportunities in distribution, transportation, and manufacturing organizations. The program is designed to equip students with the knowledge and skills to address the current and future supply-chain needs within today's industries. Graduates of the certificate program qualify for positions in governmental agencies, manufacturing, and service organizations. Employment opportunities include entry-level positions in materials management, warehousing, inventory, and as transportation coordinators. The C.T.S. in Logistics Technology may be completed 100 percent via Distance Learning Technologies, and no curricular modifications to the existing program are requested.

Curriculum Attached

New Instructional Programs:

Technical Competency Area:

Juvenile Justice
(CIP Code: 43.0110)
4 stars

Justification: The twelve (12) credit hour Technical Competency Area for Juvenile Justice will prepare completers to specialize in the provision of correction services to underage minor populations. The proposed T.C.A. will include instruction in corrections, juvenile delinquency, juvenile development and psychology, juvenile law and justice administration, social services, record-keeping procedures, and communication skills. Currently there are job openings available for well-trained Juvenile Justice workers in the Greater New Orleans area. The College has offered a successful degree program in Criminal Justice since 1975. Packaging the courses as a recognized Technical Competency Area will allow students to demonstrate successful completion of an organized set of courses, designed as an entry point to the existing Associate of Arts in Criminal Justice. Enrollment in the courses is healthy, and packaging these as a TCA will cause no additional expenditure of funds for the College.

Curriculum Attached

Board of Supervisors
March 21, 2017
PAGE THREE

Technical Competency Area:

Homeland Security
(CIP Code: 43.0110)
4 stars

Justification: The twelve (12) credit hour Technical Competency Area for Homeland Security is designed to prepare completers for entry level positions in jobs focusing on security policy, planning and operations dedicated to the protection of U.S. territory, assets, infrastructure, institutions, and citizens from external threats. The proposed T.C.A. will include instruction in national security policy, government relations, intelligence, law enforcement, security technology, communications and information technology, homeland security planning and operations, disaster planning, and applications to specific threat scenarios. Currently there are job openings available in various aspects of Homeland Security or Unified Public Safety (law enforcement, fire science, emergency medical responders, natural disaster, and terrorism response and counter-cause) in the Greater New Orleans area. The College has offered a successful degree program in Criminal Justice since 1975. Packaging the courses as a recognized Technical Competency Area will allow students to demonstrate successful completion of an organized set of courses, designed as an entry point to the existing Associate of Arts in Criminal Justice. Enrollment in the courses is healthy, and packaging these as a TCA will cause no additional expenditure of funds for the College.

Curriculum Attached

Technical Competency Areas:

Water Production, Water Treatment, Water Distribution, Wastewater Collection,
Wastewater Treatment
(CIP Code: 15.0506)
4 stars

Justification: Delgado Community College proposes a series of twenty (20) individual Technical Competency Areas (TCAs) in the areas of: Water Production, Water Treatment, Water Distribution, Wastewater Collection, and Wastewater Treatment. Each TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. Includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation.

The goal of the Technical Competency Areas is to prepare completers for the State of Louisiana water and wastewater operator examinations at all levels. Instruction in each TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the first level operator examination in Water Production Operator, Water Treatment Operator, Water Distribution Operator, Wastewater Collection Operator, and/or Wastewater Treatment Operator make the completer immediately eligible for entry into the local, regional, state, federal, public or private water or wastewater service entity. The goal of the twenty (20) Technical Competency Areas is to develop a highly trained and highly skilled workforce for water production treatment, and distribution operators, and wastewater collection and treatment operators, with opportunities for advancement and skills and certification required to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

The Technical Competency Areas, and the courses comprising these TCAs, were developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. A key point of attraction is that a high school student can enroll at the College, complete one of the level courses, sit for the state certification exam, and if successful, be hired as a member of the Region's workforce. The entry-level salary is between \$10 and \$14 per hour plus health benefits. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

Technical Competency Areas (TCAs):

- Water Production Operator I
- Water Production Operator II
- Water Production Operator III
- Water Production Operator IV
- Water Treatment Operator I
- Water Treatment Operator II
- Water Treatment Operator III
- Water Treatment Operator IV
- Water Distribution Operator I
- Water Distribution Operator II
- Water Distribution Operator III
- Water Distribution Operator IV
- Wastewater Collection Operator I
- Wastewater Collection Operator II
- Wastewater Collection Operator III
- Wastewater Collection Operator IV
- Wastewater Treatment Operator I
- Wastewater Treatment Operator II
- Wastewater Treatment Operator III
- Wastewater Treatment Operator IV

Curriculum Attached: Each T.C.A. is addressed individually in the attached documents

Certificate of Technical Studies

Human Resource Assistant

(CIP Code: 52.1001)

5 stars

Justification: Creation of a twenty-one (21) credit hour Certificate of Technical Studies program in Human Resources Assistant. Human resources specialists recruit, screen, interview, and place workers. They also may handle human resources work in a variety of other areas, such as employee relations, payroll and benefits, and training. The purpose of this certificate program is to provide students with the skills they need for an entry-level position in H.R. such as HR Clerk, H.R. Assistant I and/or HR Coordinator. All courses comprising the proposed C.T.S. are embedded within an existing Associate of Applied Science degree program, Business and Management. Packaging these courses as an exit point within the existing A.A.S. program will cause no expenditure of funds for the College.

Curriculum Attached

Certificate of Technical Studies:

Real Estate Professional

(CIP Code: 52.1501)

3 stars

Justification: The proposed C.T.S. will build on the existing T.C.A., allowing students to continue their educational and personal advancement goals while working in the Real Estate profession. The proposed C.T.S. will provide a fundamental overview of the real estate industry and the skills required to be successful in the profession. The proposed program is ideal for individuals seeking to expand their competencies related to careers as real estate agents, brokers, property managers, and other specialties. Real estate brokers and sales agents help clients buy, sell, and rent properties. Brokers and agents do the same type of work, but brokers are licensed to manage their own real estate businesses. Sales agents must work with a broker. A majority, about 57 percent, of real estate brokers and agents were self-employed in 2010. Although they often work long and irregular hours, many are able to set their own schedules. Employment of real estate brokers and sales agents is expected to grow 11 percent from 2010 to 2020, about as fast as the average for all occupations. Job opportunities will fluctuate with the economy and are, like many other sales occupations, highly dependent on personal drive, motivation, and sales ability of the individual real estate broker or sales agent. Currently, the College offers a T.C.A. level and an Associate degree level program using courses for Real Estate Sales Agents; offering the Certificate level program will provide a multi-level bridge: from T.C.A. to C.T.S., and finally to A.A.S.

Curriculum Attached

Certificate of Technical Studies:

Digital Photography

(CIP Code: 50.0605)

3 stars

Justification: The goal of this program is to provide students with an educational experience that will prepare them for a career or career specialization in digital photography, to include digital image capture, editing, and publishing. Additionally, students completing the proposed Certificate of Technical Studies program will have mastered the knowledge required to take certification examination as administered by Adobe Photoshop. The proposed program will allow students to explore options in digital imaging technologies, of which digital photography is a sub-set. New Orleans continues to be one of the nation's top-ranked cities for event, architectural, and travel photography, and with the increased emphasis in the field of digital media, there is an identified need for professional skills in digital photography. According to the U.S. Bureau of Labor Statistics, the demand for skilled digital photographers is expected to

Board of Supervisors
March 21, 2017
PAGE SEVEN

grow 13 percent between 2010 and 2020. This rate of growth is consistent with other occupations. The Georgetown University Center on Education and the Workforce predicts moderate growth in the photography/digital photography area; however, notes that skills in this area cross various occupational and career fields. The curriculum is embedded within the existing Associate of Applied Science degree program in Visual Communication-Graphic Design, and is designed to provide students with a recognized set of skills for entry into the digital photography/digital media workforce as a terminal goal, or to continue toward attainment of the Associate degree for advancement/specialization in their chosen field. The proposed C.T.S. can be offered at no additional cost to the College.

Curriculum Attached

Program Revision:

Associate of Applied Science in Hospitality Management
(CIP Code: 52.0901)
4 stars

Creation of a New Concentration:

Beverage Management

Justification: Creation of an additional concentration within the A.A.S. degree in Hospitality Management, Beverage Management. The concentration is designed to assist student enter career fields in the operation of bars, lounges, sporting venues, private clubs, and coffee/tea shops.

Curriculum Attached

Program Revision:

Associate of Applied Science in Hospitality Management
(CIP Code: 52.0901)
4 stars

Creation of a New Concentration:

Meeting and Event Management

Justification: Creation of an additional concentration within the A.A.S. degree in Hospitality Management, Meeting and Event Management. The concentration is designed to assist students enter career pathways leading to supervisory or managerial positions with logistics, convention services, and meeting management businesses.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

No changes are requested to the program's curriculum. The Associate of Arts degree in Criminal Justice at Delgado Community College has been offered since 1975. The A.A. degree program was approved to be offered via Distance Learning Technologies by the Board of Supervisors of the Louisiana Community and Technical College System, February 14, 2007; and, subsequently by the Board of Regents for Louisiana Higher Education in March of 2007. The program is currently listed in the Board of Regents Inventory of Degree and Certificate programs as "Hybrid – 50 percent to 99 percent on-line." This request is to change the designation *from* "Hybrid – 50 percent to 99 percent on-line" *to* "Online – 100 percent online." While no curricular modifications are presented for review or action, the College notes that since 2007, all of the courses comprising the instructional program may now be completed on-line, so a change in official designation on the Inventory of Degree and Certificate programs and on the Louisianaonline.org website is requested.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

All of the courses comprising the instructional program may currently be completed on-line, however, the official designation on the Inventory of Degree and Certificate programs and on the Louisianaonline.org website lists the program as "Hybrid – 50 percent to 99 percent online." A change of classification to "Online – 100 percent online" is requested.

DELIVERY OF DEGREE PROGRAMS THOROUGH DISTANCE EDUCATION TECHNOLOGY

REQUEST FOR AUTHORITY TO OFFER AN EXISTING ACADEMIC PROGRAM THROUGH DISTANCE LEARNING TECHNOLOGIES

(Academic Affairs Policy 2.12, revised January 2014)

1. University or College

Delgado Community College

2. Name, Phone and Email Address of contact person for questions regarding this request

Tim Stamm, Executive Director Curriculum and Program Development
(504) 671-5482
tstamm@dcc.edu

3. Name of Degree Program and CIP Classification

Associate of Arts – Criminal Justice
CIP Code: 43.0107

4. List the initial date of implementation

The Associate of Arts degree in Criminal Justice at Delgado Community College has been offered since 1975. The A.A. degree program was approved to be offered via Distance Learning Technologies by the Board of Supervisors of the Louisiana Community and Technical College System, February 14, 2007; and, subsequently by the Board of Regents for Louisiana Higher Education in March of 2007. The program is currently listed in the Board of Regents Inventory of Degree and Certificate programs as "Hybrid – 50 percent to 99 percent on-line." This request is to change the designation *from* "Hybrid – 50 percent to 99 percent on-line" *to* "Online – 100 percent online." No curricular modifications are presented for review or action; however, since 2007, all of the courses comprising the instructional program may now be completed on-line, so a change in official designation on the Inventory of Degree and Certificate programs and on the Louisianaonline.org website is requested.

5. Briefly describe the program. If there are any differences (e.g., curriculum, admission, graduation requirements, etc.) between the program to be delivered via distance learning and the program offered through traditional delivery modes, explain and provide a rational for the differences.

Delgado Community College in New Orleans, Louisiana is fully accredited by the Southern Association of Colleges and Schools – Commission on Colleges (SACSCOC). Degree and Certificate programs offered are authorized by the Louisiana Community & Technical College System (LCTCS) and the Board of Regents for Louisiana Higher Education. In addition to meeting the rigorous requirements set forth by SACSCOC, all programs eligible for professional association accreditation have passed the review process and possess accredited status.

6. Briefly describe the extent to which the program will be offered via distance learning.

The A.A. in Criminal Justice may be completed 100 percent via Distance Learning Technologies. The program is designed for students whose career interests are in law enforcement, law, and corrections, the Criminal Justice program provides preparation for direct entry into the workforce, for transfer to senior colleges, and for professional advancement.

7. Describe distance learning technologies which will be used to offer the proposed program.

Delgado Community Colleges uses the CANVAS learning management system for all courses and instructional program offered via Distance Education Technologies.

8. Indicate where (city/town and parish) the proposed program will be offered.

Currently, courses and program offerings available via on-line learning technologies may be accessed anywhere by students with an active connection to the World Wide Web.

9. Describe processes in place to ensure that students have structured access to faculty.

The College provides regular access to all student services and student/faculty interaction through Distance Education technologies. Faculty teaching sections of courses via Distance Education must follow guidelines established by the College in providing opportunities for student interaction for classwork and for individual consultation. The College's Policy, AA.2122.2.D: Workload Requirements for Full-time Faculty, defines the requirement for holding office hours: "Full-time faculty members are required to post 10 office hours per week. These office hours must be at times convenient for students and must be at least 30 minutes in length." Adjunct faculty, as defined in the Faculty Handbook: Adjunct Faculty Workload Requirements/Responsibilities, must adhere to following regarding office hours: "hold office hours in the amount of (30) minutes per lecture/lab course." Additionally, the College's Quality Enhancement Plan (QEP) submitted to and approved by the Commission on Colleges in 2008, titled "Going the Distance: Improving Distance Learning in a Climate of Recovery, Regeneration, and Transformation," provides detailed information regarding faculty training, responsibilities, and expectations for teaching at a distance; as well, as quality assurances and controls for all course sections taught via Distance Learning Technologies. In addition to faculty roles, responsibilities, and support mechanisms, the QEP outlined student pre-assessment responsibilities and identified student academic support services specifically targeted to the distance education student. The information contained in the QEP was institutionalized at the College, upon final approval of the project by the Commission on Colleges with submission and acceptance of the Fifth Year Interim Report in September, 2011.

If this is the campus' first request for approval to offer 50% or more of a program electronically, upon approval by the Board of Regents the campus must submit notification to the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) prior to implementation. Once the SACSCOC provides a letter acknowledging acceptance of this notification to the campus, a copy should be provided to the Board of Regents.

Delgado Community College is authorized by the Commission on Colleges of the Southern Association of Colleges and Schools to offer instructional programs via Distance Learning Technologies at 50 percent or more, and is not required to seek prior approval when initiating distance education for existing instructional programs at 50 percent or more (notification, via summary report is required). This information is on-file with the Board of Regents since 2007.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

This request is to offer the existing instructional program in Logistics Technology via Distance Learning Technologies. The C.T.S. in Logistics Technology may be completed 100 percent via Distance Learning Technologies. The Logistics Technology program is designed to prepare students for a multitude of career opportunities in distribution, transportation, and manufacturing organizations. The program is designed to equip students with the knowledge and skills to address the current and future supply-chain needs within today's industries. Graduates of the certificate program qualify for positions in governmental agencies, manufacturing, and service organizations. Employment opportunities include entry-level positions in materials management, warehousing, inventory, and as transportation coordinators.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

Coursework in the existing C.T.S. program may be completed 100 percent via Distance Education Technologies. Requesting authorization to offer the program on-line will allow the College and the State to promote the program as available to students in its entirety on-line.

DELIVERY OF DEGREE PROGRAMS THOROUGH DISTANCE EDUCATION TECHNOLOGY

REQUEST FOR AUTHORITY TO OFFER AN EXISTING ACADEMIC PROGRAM THROUGH DISTANCE LEARNING TECHNOLOGIES

(Academic Affairs Policy 2.12, revised January 2014)

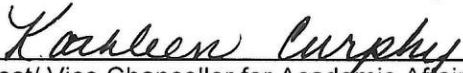

1. **University or College**
Delgado Community College
2. **Name, Phone and Email Address of contact person for questions regarding this request**
Tim Stamm, Executive Director Curriculum and Program Development
(504) 671-5482
tstamm@dcc.edu
3. **Name of Degree Program and CIP Classification**
Certificate of Technical Studies: Logistics Technology
CIP Code: 52.0203
4. **List the initial date of implementation**
The Certificate of Technical Studies in Logistics Technology was originally approved by the Louisiana Community and Technical College System, and was entered into the Board of Regents Inventory of Degree and Certificate programs in 2004.
5. **Briefly describe the program. If there are any differences (e.g., curriculum, admission, graduation requirements, etc.) between the program to be delivered via distance learning and the program offered through traditional delivery modes, explain and provide a rational for the differences.**
Delgado Community College in New Orleans, Louisiana is fully accredited by the Southern Association of Colleges and Schools – Commission on Colleges (SACSCOC). Degree and Certificate programs offered are authorized by the Louisiana Community & Technical College System (LCTCS) and the Board of Regents for Louisiana Higher Education. In addition to meeting the rigorous requirements set forth by SACSCOC, all programs eligible for professional association accreditation have passed the review process and possess accredited status. No differences exist in the instructional content or student learning outcomes for the C.T.S. in Logistics Technology as taught face-to-face and via Distance Learning Technologies.
6. **Briefly describe the extent to which the program will be offered via distance learning.**
The C.T.S. in Logistics Technology may be completed 100 percent via Distance Learning Technologies. The Logistics Technology program is designed to prepare students for a multitude of career opportunities in distribution, transportation, and manufacturing organizations. The program is designed to equip students with the knowledge and skills to address the current and future supply-chain needs within today's industries. Graduates of the certificate program qualify for positions in governmental agencies, manufacturing, and service organizations. Employment opportunities include entry-level positions in materials management, warehousing, inventory, and as transportation coordinators.
7. **Describe distance learning technologies which will be used to offer the proposed program.**
Delgado Community Colleges uses the CANVAS learning management system for all courses and instructional program offered via Distance Education Technologies.
8. **Indicate where (city/town and parish) the proposed program will be offered.**
Currently, courses and program offerings available via on-line learning technologies may be accessed anywhere by students with an active connection to the World Wide Web.

9. Describe processes in place to ensure that students have structured access to faculty.

The College provides regular access to all student services and student/faculty interaction through Distance Education technologies. Faculty teaching sections of courses via Distance Education must follow guidelines established by the College in providing opportunities for student interaction for classwork and for individual consultation. The College's Policy, AA.2122.2.D: Workload Requirements for Full-time Faculty, defines the requirement for holding office hours: "Full-time faculty members are required to post 10 office hours per week. These office hours must be at times convenient for students and must be at least 30 minutes in length." Adjunct faculty, as defined in the Faculty Handbook: Adjunct Faculty Workload Requirements/Responsibilities, must adhere to following regarding office hours: "hold office hours in the amount of (30) minutes per lecture/lab course." Additionally, the College's Quality Enhancement Plan (QEP) submitted to and approved by the Commission on Colleges in 2008, titled "Going the Distance: Improving Distance Learning in a Climate of Recovery, Regeneration, and Transformation," provides detailed information regarding faculty training, responsibilities, and expectations for teaching at a distance; as well, as quality assurances and controls for all course sections taught via Distance Learning Technologies. In addition to faculty roles, responsibilities, and support mechanisms, the QEP outlined student pre-assessment responsibilities and identified student academic support services specifically targeted to the distance education student. The information contained in the QEP was institutionalized at the College, upon final approval of the project by the Commission on Colleges with submission and acceptance of the Fifth Year Interim Report in September, 2011.

If this is the campus' first request for approval to offer 50% or more of a program electronically, upon approval by the Board of Regents the campus must submit notification to the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) prior to implementation. Once the SACSCOC provides a letter acknowledging acceptance of this notification to the campus, a copy should be provided to the Board of Regents.

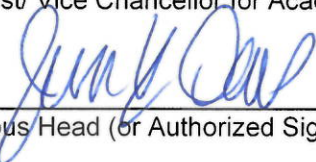

Delgado Community College is authorized by the Commission on Colleges of the Southern Association of Colleges and Schools to offer instructional programs via Distance Learning Technologies at 50 percent or more, and is not required to seek prior approval when initiating distance education for existing instructional programs at 50 percent or more (notification, via summary report is required). This information is on-file with the Board of Regents since 2007.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

Delgado Community College proposes a twelve (12) credit hour Technical Competency Area for Juvenile Justice. Instructional programs in Juvenile Justice prepare completers to specialize in the provision of correction services to underage minor populations. The proposed T.C.A. will include instruction in corrections, juvenile delinquency, juvenile development and psychology, juvenile law and justice administration, social services, record-keeping procedures, and communication skills.

Upon successful completion of the Technical Competency Area, the student will be able to:

- ✓ Explain the historical perspectives of the juvenile justice system, as it relates to law enforcement
- ✓ Explain the methods used by law enforcement personnel to effectively address juvenile issues within a community
- ✓ Describe the legal issues and procedures related to the application of the penal code in juvenile justice

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The United States Department of Labor notes that "employment of juvenile justice officers/specialists is expected to increase by 4 percent through the year 2020." The Georgetown Center on Education and the Workforce does not predict growth for the area of juvenile justice, but does note the importance of correction reform, especially as it relates to juvenile populations. In most states, on-job-training is required for entry, and the Center is encouraged that many states have initiated formal education/training requirements for juvenile justice workers. Currently there are job openings available for well-trained Juvenile Justice workers in the Greater New Orleans area, and the Louisiana Community and Technical College System notes the profession with a star rating of 4. Delgado has offered a successful degree program in Criminal Justice since 1975. Packaging the courses as a recognized Technical Competency Area will allow students to demonstrate successful completion of an organized set of courses, designed as an entry point to the existing Associate of Arts in Criminal Justice. Enrollment in the courses is healthy, and packaging these as a TCA will cause no additional expenditure of funds for the College.

DESCRIBE IMPLEMENTATION COSTS (include Faculty, Facilities, Library Resources, etc.)
<p>All courses comprising the proposed T.C.A. in Juvenile Justice are existing courses at the College used in the existing Associate of Arts degree program in Criminal Justice, and enrollment in these courses is healthy. Packaging these as a TCA will cause no additional expenditure of funds for the College as existing faculty, both full-time and part-time, already teach the courses comprising the proposed program. Courses comprising the proposed T.C.A. are taught in existing general purpose classrooms at the College. The College Library holds 447 print monographs (books), 1,646 electronic books, and 143 audio-visual/e-Media resources directly related to Criminal Justice, and its subset of Juvenile Justice. The College subscribes to the following print serials (journals): Corrections Today, Journal of Criminal Justice, Criminology, Criminology and Public Policy, Criminal Justice Research, and Criminal Justice Review. In addition to print serials, the College subscribes to the following databases, with full-text access to scholarly peer-reviewed articles: <i>Criminal Justice Abstracts</i>; <i>International Security and Counter-Terrorism Reference Center</i>, and Academic Search Premier and Lexis-Nexis Academic (combined these two databases provide access to 59 individual serial titles).</p>

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

Delgado Community College proposes a twelve (12) credit hour Technical Competency Area for Homeland Security. Instructional programs in Homeland Security prepare completers for entry level positions in jobs focusing on security policy, planning and operations dedicated to the protection of U.S. territory, assets, infrastructure, institutions, and citizens from external threats. The proposed T.C.A. will include instruction in national security policy, government relations, intelligence, law enforcement, security technology, communications and information technology, homeland security planning and operations, disaster planning, and applications to specific threat scenarios.

Upon successful completion of the Technical Competency Area, the student will be able to:

- ✓ Identify key events and explain critical issues in the historical development of the United States Intelligence Community
- ✓ Discuss the concepts and ideas associated with the subjects of intelligence, terrorism, and national security
- ✓ Discuss the ethics and integrity challenges associated with homeland security
- ✓ Describe homeland security management principles, tools, and applications, as these relate to the Criminal Justice field

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The United States Department of Labor notes that "employment of security officers/specialists is expected to increase by 4 percent through the year 2020." The Georgetown Center on Education and the Workforce notes that the term 'homeland security' is often too broad to collect data to make predictions, preferring the term 'unified public safety.' Unified Public Safety encompasses law enforcement (criminal justice), fire protection (fire science), and emergency medical technician (responders and paramedics), as well as natural disaster and terrorism response and counter-cause professionals. The Center predicts steady employment opportunities and moderate growth for positions in Unified Public Safety, with policy, fire, and EMT showing stronger growth outlook. Currently there are job openings available in various aspects of Unified Public Safety in the Greater New Orleans area, and the Louisiana Community and Technical College System notes the profession with a star rating of 4. The college has offered a successful degree program in Criminal Justice since 1975. Packaging the courses as a recognized Technical Competency Area will allow students to demonstrate successful completion of an organized set of courses, designed as an entry point to the existing Associate of Arts in Criminal Justice. Enrollment in the courses is healthy, and packaging these as a TCA will cause no additional expenditure of funds for the College.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Water Production Operator I examination. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the first level operator examination in Water Production Operator makes the completer immediately eligible for entry into the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. A key point of attraction is that a high school student can enroll at the College, complete one of the level courses, sit for the state certification exam, and if successful, be hired as a member of the Region's workforce. The entry-level salary is between \$10 and \$14 per hour plus health benefits. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE IMPLEMENTATION COSTS (Include Faculty, Facilities, Library Resources, etc.)

The New Orleans Sewerage and Water Board has volunteered to host courses at their uptown facility and to provide tours of the facility in the hopes of attracting prospective students and future employees. Currently, Delgado has three (3) full-time faculty members who have been trained to teach courses in Water/Wastewater Technology. Library and instructional resources in Water/Wastewater are present as sub-sets of materials used for: Civil and Construction Applied Engineering, Instrumentation and Controls, and general health, safety, and the physical sciences collection. Currently, the Library holds 132 resources, in print and electronic formats, directly related to Water and Wastewater Technology instruction.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Water Production Operator II examination. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the second level operator examination in Water Production Operator makes the completer immediately eligible for advancement in the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

IMPLEMENTATION DATE (Semester and Year)

Summer 2018 (201830)

DESCRIBE IMPLEMENTATION COSTS (Include Faculty, Facilities, Library Resources, etc.)

The New Orleans Sewerage and Water Board has volunteered to host courses at their uptown facility and to provide tours of the facility in the hopes of attracting prospective students and future employees. Currently, Delgado has three (3) full-time faculty members who have been trained to teach courses in Water/Wastewater Technology. Library and instructional resources in Water/Wastewater are present as sub-sets of materials used for: Civil and Construction Applied Engineering, Instrumentation and Controls, and general health, safety, and the physical sciences collection. Currently, the Library holds 132 resources, in print and electronic formats, directly related to Water and Wastewater Technology instruction.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Water Treatment Operator Level I examination. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the first level operator examination in Water Treatment Operator makes the completer immediately eligible for entry into the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water treatment operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. A key point of attraction is that a high school student can enroll at the College, complete one of the level courses, sit for the state certification exam, and if successful, be hired as a member of the Region's workforce. The entry-level salary is between \$10 and \$14 per hour plus health benefits. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Water Treatment Operator examination, level II. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the second level operator examination in Water Treatment Operator makes the completer immediately eligible for advancement in the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE IMPLEMENTATION COSTS (Include Faculty, Facilities, Library Resources, etc.)

The New Orleans Sewerage and Water Board has volunteered to host courses at their uptown facility and to provide tours of the facility in the hopes of attracting prospective students and future employees. Currently, Delgado has three (3) full-time faculty members who have been trained to teach courses in Water/Wastewater Technology. Library and instructional resources in Water/Wastewater are present as sub-sets of materials used for: Civil and Construction Applied Engineering, Instrumentation and Controls, and general health, safety, and the physical sciences collection. Currently, the Library holds 132 resources, in print and electronic formats, directly related to Water and Wastewater Technology instruction.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Water Treatment Operator examination, level III. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the third level operator examination in Water Treatment Operator makes the completer immediately eligible for advancement in the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

IMPLEMENTATION DATE (Semester and Year)

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Water Distribution Operator I examination. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the first level examination in Water Distribution Operator makes the completer immediately eligible for entry into the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. A key point of attraction is that a high school student can enroll at the College, complete one of the level courses, sit for the state certification exam, and if successful, be hired as a member of the Region's workforce. The entry-level salary is between \$10 and \$14 per hour plus health benefits. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Water Distribution Operator examination, level III. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the third level examination in Water Distribution Operator makes the completer immediately eligible for advancement in the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE IMPLEMENTATION COSTS (Include Faculty, Facilities, Library Resources, etc.)

The New Orleans Sewerage and Water Board has volunteered to host courses at their uptown facility and to provide tours of the facility in the hopes of attracting prospective students and future employees. Currently, Delgado has three (3) full-time faculty members who have been trained to teach courses in Water/Wastewater Technology. Library and instructional resources in Water/Wastewater are present as sub-sets of materials used for: Civil and Construction Applied Engineering, Instrumentation and Controls, and general health, safety, and the physical sciences collection. Currently, the Library holds 132 resources, in print and electronic formats, directly related to Water and Wastewater Technology instruction.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Water Distribution Operator examination, level IV. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the highest level operator examination in Water Distribution Operator makes the completer immediately eligible for advancement in the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Wastewater Collection Operator Level I examination. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the first level operator examination in Wastewater Collection Operator makes the completer immediately eligible for entry into the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water treatment operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. A key point of attraction is that a high school student can enroll at the College, complete one of the level courses, sit for the state certification exam, and if successful, be hired as a member of the Region's workforce. The entry-level salary is between \$10 and \$14 per hour plus health benefits. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Wastewater Collection Operator examination, level IV. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the highest level operator examination in Wastewater Collection Operator makes the completer immediately eligible for advancement in the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

IMPLEMENTATION DATE (Semester and Year)

Summer 2018 (201830)

DESCRIBE IMPLEMENTATION COSTS (Include Faculty, Facilities, Library Resources, etc.)
The New Orleans Sewerage and Water Board has volunteered to host courses at their uptown facility and to provide tours of the facility in the hopes of attracting prospective students and future employees. Currently, Delgado has three (3) full-time faculty members who have been trained to teach courses in Water/Wastewater Technology. Library and instructional resources in Water/Wastewater are present as sub-sets of materials used for: Civil and Construction Applied Engineering, Instrumentation and Controls, and general health, safety, and the physical sciences collection. Currently, the Library holds 132 resources, in print and electronic formats, directly related to Water and Wastewater Technology instruction.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to address needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. A key point of attraction is that a high school student can enroll at the College, complete one of the level courses, sit for the state certification exam, and if successful, be hired as a member of the Region's workforce. The entry-level salary is between \$10 and \$14 per hour plus health benefits. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

The proposed TCA will be comprised of one (1) three-credit hour course. Instruction in water production and collection prepares individuals to apply basic engineering principles and technical skills in support of engineers and other professionals engaged in developing and using water storage, waterpower, and wastewater treatment systems. The proposed TCA includes instruction in water storage, power and/or treatment systems and equipment; testing and inspection procedures; system maintenance procedures; and report preparation. The goal of the Technical Competency Area is to prepare completers for the State of Louisiana Wastewater Treatment Operator examination, level IV. Instruction in this TCA provides students with the opportunity to master competencies required to successfully sit for and pass the state examination. Successful completion of each level requires one year of work in the field before the student may attempt the next level examination. Successful completion of the highest level operator examination in Wastewater Treatment Operator makes the completer immediately eligible for advancement in the local, regional, state, federal, public or private water or wastewater service entity. The goal of the proposed TCA is to develop a highly trained and highly skilled workforce for water operators to meet contemporary workforce needs. After successfully completing each of the proposed TCAs, the student will have foundational knowledge and will have mastered the competencies as developed by the Louisiana Department of Health and Hospitals.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

The proposed Technical Competency Area was developed in conjunction with The New Orleans Sewerage and Water Board to addresses needs for the training and selection of a qualified and educated workforce. At the local, regional, and state level there is an understaffed, aging, and retiring water operator workforce. This set of technical competencies has been developed based on the needs expressed by the New Orleans Sewerage and Water Board and several public and private entities that hold concerns about the present and future of our water services. At any given time, there are a couple of hundred jobs in the water services sector in the Greater New Orleans Region, and the turnover rate is high due to several factors, such as employees retiring, moving to higher paying jobs upon completing upper-level certifications, or leaving the field due to the demanding nature of the work. The goal is to establish a continuous flow of workers to the Region to keep up with the turnover. The jobs are virtually recession proof and workers can advance to higher paying positions by completing additional instruction and certification.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

Delgado Community College proposes a twenty-one (21) credit hour Certificate of Technical Studies program in Human Resources Assistant. Human resources specialists recruit, screen, interview, and place workers. They also may handle human resources work in a variety of other areas, such as employee relations, payroll and benefits, and training. The purpose of this certificate program is to provide students with the skills they need for an entry-level position in H.R. such as HR Clerk, H.R. Assistant I and/or HR Coordinator.

Specifically, graduates of the proposed program will be able to:

- ✓ create HR reports using word, excel, access, and power point
- ✓ provide information regarding wages, opportunities for promotion, and employee benefits;
- ✓ maintain confidential files on employees;
- ✓ provide administrative support for various employee compensation and benefits activities;
- ✓ collect labor market data;
- ✓ research reports that are generated from multiple sources which may include the internet
- ✓ assist with HR processes including recruiting and staffing, training & development, and work place health, safety and security

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

Students in the proposed program will learn the basics of what a Human Resource Office does, legal issues related to labor law, interviewing techniques, team building and supervision. All of the courses comprising the Human Resource Assistant Certificate of Technical Studies can be applied towards an Associate of Applied Science degree in Business and Management with a Concentration in Human Resource Management/Leadership. All courses are existing at the College, and are offered on a regular basis. Delgado Community College has never offered a Certificate of Technical Studies program in Human Resources Assistant; however, does offer an existing Associate of Applied Science degree in Business and Management, with a Concentration in Human Resources Management/Leadership. The existing A.A.S. program has a long history at the College, and is designed to provide students with the skills and competencies required to enter the workforce immediately upon completion of degree, as opposed to transfer to a related baccalaureate degree program. Students wishing to pursue a transfer path have two options with existing degree programs: the

Associate of Science in Business Administration and/or the Associate of Arts Louisiana Transfer, with a Concentration in Business. All courses comprising the proposed Certificate of Technical Studies are applicable to the A.A.S. in Business & Management. Employment of human resources specialists is expected to grow 21 percent from 2010 to 2020, faster than the average for all occupations. Job opportunities should be good overall, especially in the employment services industry. All courses comprising the proposed C.T.S. are currently offered at the College, and the proposed C.T.S. can be offered at no additional cost to the College.

	If YES, please provide projected accreditation/licensure/certification date: Accreditation falls under umbrella accreditation by ATMAE, and the new exit point to the existing A.A.S. will not require a separate site visit.
Type/Name of Program Accreditation, Licensure or Certification Required:	Accreditation Council for Business Schools and Programs (ACBSP) 7007 College Boulevard, Suite 420 Overland Park, KS 66211 913-339-9356 www.acbsp.org

DESCRIBE IMPLEMENTATION COSTS (Include Faculty, Facilities, Library Resources, etc.)

No new costs are associated with program implementation. The program faculty are existing, as is the coursework. Courses in the Business and Management subject areas are taught in existing general purpose classrooms at the College; in addition to general purpose classrooms, several computer teaching classrooms and learning laboratories are used exclusively by the Business programs for instruction and student learning activities. Delgado Community College operates full-service libraries at all campuses and instructional sites. The *Moss Memorial Library* at Delgado Community College serves as the main depository for the collection of information resources. Currently, college-wide, the collection consists of a total of 360,519 resources including: 150,314 monographs (books), 565 serials (periodicals), 618 audio-visual resources, and 209,022 electronic resources (75,885 e-journals, and 133,137 e-books). Currently, there are 7,083 items available for circulation, directly related to Business and Management. In addition the following electronic databases, Academic Search Complete, Business Source Complete, Arts & Sciences Collection I-IV (JSTOR), Entrepreneurship (ProQuest), and Regional Business News, provide access to full-text scholarly and peer-reviewed items for use by library patrons.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

Delgado Community College proposes an eighteen (18) credit hour Certificate of Technical Studies program in Real Estate Professional. The proposed Certificate of Technical Studies (C.T.S.) program provides learners with the education required to obtain a real estate salespersons license. RLST-161: Principles of Real Estate and RLST-261: Louisiana Real Estate Law meet the Louisiana Real Estate Commission's pre-education hours required to sit for the Louisiana Real Estate Salesperson examination, and currently comprise a Technical Competency Area (T.C.A.). The proposed C.T.S. will build on the existing T.C.A., allowing students to continue their educational and personal advancement goals while working in the Real Estate profession. The proposed C.T.S. will provide a fundamental overview of the real estate industry and the skills required to be successful in the profession. The proposed program is ideal for individuals seeking to expand their competencies related to careers as real estate agents, brokers, property managers, and other specialties. Real estate brokers and sales agents help clients buy, sell, and rent properties. Brokers and agents do the same type of work, but brokers are licensed to manage their own real estate businesses. Sales agents must work with a broker. A majority, about 57 percent, of real estate brokers and agents were self-employed in 2010. Although they often work long and irregular hours, many are able to set their own schedules

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

Currently, the College offers a Technical Competency Area (T.C.A.) in Real Estate Sales Agent comprised of two-courses (six credit hours) embedded within the proposed C.T.S.; and, all courses comprising the proposed C.T.S. can be applied toward the existing Associate of Applied Science degree in Business and Management, with a Concentration in Real Estate. The existing A.A.S. program has a long history at the College, and is designed to provide students with the skills and competencies required to enter the workforce immediately upon completion of degree, as opposed to transfer to a related baccalaureate degree program. Students wishing to pursue a transfer path have two options with existing degree programs: the Associate of Science in Business Administration and/or the Associate of Arts Louisiana Transfer, with a Concentration in Business. Employment of real estate brokers and sales agents is expected to grow 11 percent from 2010 to 2020, about as fast as the average for all occupations. Job opportunities will fluctuate with the economy and are, like many other sales

occupations, highly dependent on personal drive, motivation, and sales ability of the individual real estate broker or sales agent. Currently, the College offers a T.C.A. level and an Associate degree level program using courses for Real Estate Sales Agents; offering the Certificate level program will provide a multi-level bridge: from T.C.A. to C.T.S., and finally to A.A.S.

DESCRIBE THE PROPOSED CHANGE (For Curriculum Modifications, state previous credit and clock hours, and for Program Termination, state program and all award levels.)

Delgado Community College proposes an eighteen (18) credit hour Certificate of Technical Studies program in Digital Photography. Digital Photographers use their technical expertise, creativity, and composition skills to produce and preserve images that visually tell a story or record an event. The goal of this program is to provide students with an educational experience that will prepare them for a career or career specialization in digital photography, to include digital image capture, editing, and publishing. Additionally, students completing the proposed Certificate of Technical Studies program will have mastered the knowledge required to take certification examination as administered by Adobe Photoshop. The proposed program will allow students to explore options in digital imaging technologies, of which digital photography is a sub-set. Digital photography uses photosensitive charge coupled devices (CCDs) to capture the image focused by the lens, as opposed to an exposure on photographic film. The captured image is then digitized and stored as a computer file ready for digital processing, viewing, digital publishing or printing.

REASON/JUSTIFICATION FOR THE PROPOSED CHANGE (Include support such as four-year university agreements, industry demand, advisory board information, etc.)

New Orleans continues to be one of the nation's top-ranked cities for event, architectural, and travel photography, and with the increased emphasis in the field of digital media, there is an identified need for professional skills in digital photography. According to the U.S. Bureau of Labor Statistics, the demand for skilled digital photographers is expected to grow 13 percent between 2010 and 2020. This rate of growth is consistent with other occupations. The Georgetown University Center on Education and the Workforce predicts moderate growth in the photography/digital photography area; however, notes that skills in this area cross various occupational and career fields. The curriculum is embedded within the existing Associate of Applied Science degree program in Visual Communication-Graphic Design, and is designed to provide students with a recognized set of skills for entry into the digital photography/digital media workforce as a terminal goal, or to continue toward attainment of the Associate degree for advancement/specialization in their chosen field. The proposed C.T.S. can be offered at no additional cost to the College.

DESCRIBE IMPLEMENTATION COSTS (include Faculty, Facilities, Library Resources, etc.)
<p>All faculty, facilities, equipment, and instructional resources are existing at the College, and the proposed program may be initiated with no additional cost to the College. The College has adequate classrooms to house the proposed Certificate program. 3,480 square feet of space is designated for use of the Visual Communication-Graphic Design program to include multiple computer laboratories for instruction using state-of-the-art MacIntosh computer systems and industry-standard image capture, editing, and manipulation software. In addition, an 653 square foot digital photography lab contains professional lighting, backdrop, and staging areas to complete a variety of digital studio portrait work. Delgado Community College operates full-service libraries at all campuses and instructional sites. The <i>Moss Memorial Library</i> at Delgado Community College serves as the main depository for the collection of information resources. Currently, college-wide, the collection consists of a total of 360,519 resources including: 150,314 monographs (books), 565 serials (periodicals), 618 audio-visual resources, and 209,022 electronic resources (75,885 e-journals, and 133,137e-books). Currently, there are 698 items available for circulation, directly related to Graphic Arts and Photography. In addition the following electronic databases, Academic Search Complete, Applied Science & Technology, Arts & Sciences Collection I-V (JSTOR), ARTstor, and Computer Sources, provide access to full-text scholarly and peer-reviewed items for use by library patrons.</p>

DESCRIBE IMPLEMENTATION COSTS (Include Faculty, Facilities, Library Resources, etc.)

No additional costs for faculty or physical resources are required, as the degree program is an existing one at the College. Current faculty will teach the courses, or adjunct faculty will be hired from an existing adjunct pool or new adjuncts will be hired and costs covered by student enrollment in the section. The College Library holds collections relevant to Hospitality Management, to include: 814 print books, 909 electronic books, and 393 audio-visual / eMedia resources. In addition, access to the following print serials (periodicals) provide opportunities for research: Business Horizons, Food Management, Official Louisiana Tour Guide, Nation's Restaurant News, and Restaurant Business. Electronic titles include: Caterer & Hotelkeeper, Cornell Hotel & Restaurant Administration Quarterly, Hotel Management, Hotels, International Journal of Contemporary Hospitality Management, International Journal of Tourism Research, Journal of Convention & Event Tourism, Journal of Sustainable Tourism, Lodging Hospitality, Travel Agent, and Travel Weekly. On-line access to databases include: Academic Search Complete, Hospitality and Tourism Index (HTI), Career Transition, Careers Internet Database, and Occupational Outlook Handbook. Acquisition of an entirely new set of print and/or electronic resources is not necessary to implement the various new concentrations; however, through regular assessment, review, and weeding, new materials will be acquired to reflect contemporary industry and instructional content.
